

EKOVA[®]
GREEN COMMUNITY

**Welcome to Your Sustainable Paradise
on Mexico's Costalegre**

Ekoa Green Community® is a pioneering green community in Playa Grande, Arroyo Seco —
the gem of the southern Costalegre, Jalisco, Mexico.

A Hidden Paradise:

Tucked between the Sierra Madre foothills and the Pacific Ocean, Ekoa Green Community® is not just another subdivision—it is a *vision*.

It is a vibrant and harmonious ecological community, where sustainable design and respectful land use intertwine in a rich ecological tapestry of bamboo forests, palm trees, and tropical deciduous forest.

We are respectful of the protected natural areas, which include a bamboo and palm forest that serves as a refuge for endangered military macaws, a reforestation zone with native trees, a freshwater pond, an organic fruit orchard, and threatened tropical deciduous forest.

Playa Grande, Arroyo Seco, Jalisco, México.

Enjoy the **Costalegre Lifestyle** — Miles of unspoiled coastline, turquoise blue waters, secret surf beaches, and fresh gourmet cuisine await you.

Low-Density Development with Extensive Green Spaces

A community with ecological planning, covering more than eight hectares and only 32 exclusive lots, nestled around our freshwater pond, surrounded by tropical deciduous forest, and perched on cliffs with breathtaking ocean views.

What Makes Ekoa® Sustainable?

We have covenants that guarantee:

-  **Minimal environmental impact:**
Home sizes are limited to 20% of lot size and up to two stories high
-  **Sustainable building materials like bamboo and palm**
-  **Bespoke bio-architecture**
-  **Comfortable bio-climatic design**
-  **Future solar grid intertie systems**
-  **Solar hot water heaters**
-  **Conservation and community projects**
-  **Clean and abundant water from our private well**

We use traditional practical and structural materials such as concrete and steel, but we significantly reduce their use—and therefore the ecological footprint—by taking advantage of sustainable materials such as bamboo, palm, and thatched roofing.

Why Bamboo? It's Renewable and Resilient:

Sustainable:

Regenerates 10x faster than traditional timber, and is stronger than steel by weight.

Earthquake Resistant: Ideal for coastal Mexico, bamboo's flexibility offers superior earthquake protection.

Cool and Comfortable: Our signature bamboo palapa roofs provide unparalleled ventilation.

Warm Beauty: Its natural elegance and warmth create an inspiring and relaxing environment.

Own Your Own Coastal Eco-Home in a Green Community

Enjoy Your Own Ecological Coastal Home in a Green Community

Nestled in the center of Ekoa Green Community®, Villa Tortuga is the perfect example of the type of villas planned for our development. At Villa Tortuga, sustainable, bioclimatic and traditional materials combine with the aim of maintaining harmony with the ecosystem.

If you'd like to experience natural luxury in a spectacular environment, Villa Tortuga is available for rent for groups of up to 15 people.

Enjoy Villa Tortuga, where you'll feel part of an emerging ecological community offering a sense of personal freedom and shared stewardship of the land.

All investors of Ekoa Green Community® have free access to the nearby Capacha Center beach club where Rojo Restaurant is located, offering a variety of fresh seafood dishes and vegetarian and vegan options inspired by local ingredients.

(Leopardus pardalis)

Surrounded by Wild Nature

Extraordinary Biodiversity and Endemism

The Costalegre is home to thousands of species of plants and animals with extremely high rates of endemism (species that are *only* found in this bioregion). Its expansive tropical deciduous forests are the most threatened tropical ecosystem on the planet. Much of its biodiversity is protected in the nearby Chamela-Cuixmala Biosphere Reserve, only 15 minutes north of us.

Activities Abound

Stand Up Paddle Boarding

Surfing

Careyes Festivals

Sea Kayaking

Surfing Playa Grande's Breaks

Mountain Biking and Hiking

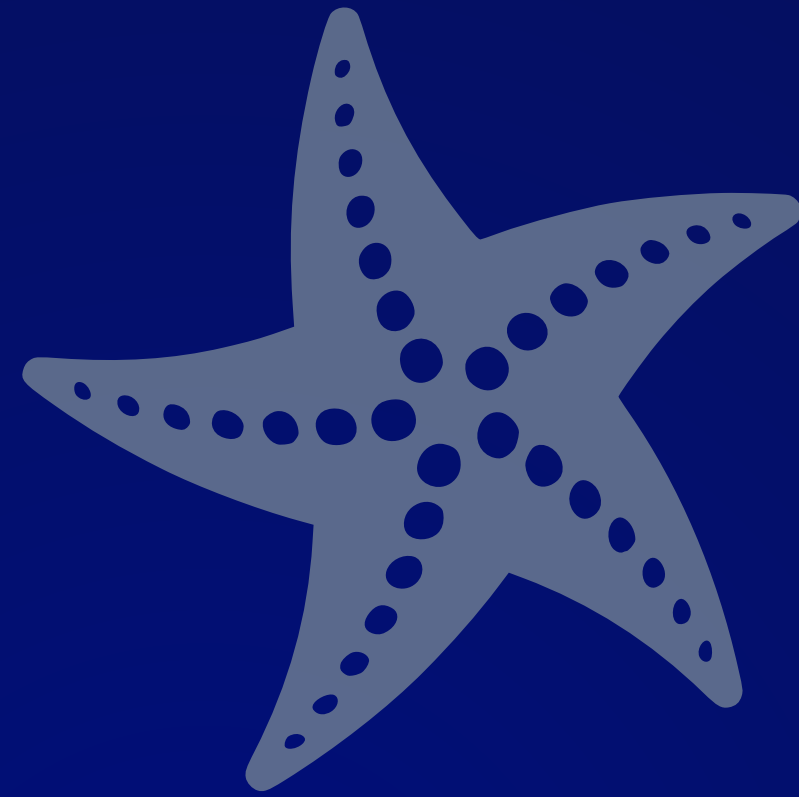

Organic gardening on-site and in collaboration with the Arroyo Seco Primary School Garden Initiative

Sea Turtle Conservation Program

We have been protecting
Sea Turtles at Playa Grande
from predators for three years
running.

Your investment in Ekoa Green Community®
helps protect Sea Turtles and future Military Macaws

Whale Watching Season:

November to April

During these months, northern humpback whales migrate to the Costalegre to reproduce and give birth to their calves. It is common to see them at Playa Grande.

Invest with Guaranteed Confidence
